

BASEL III DISCLOSURES OF THE INDIA BRANCHES FOR THE QUARTER ENDED 30 JUNE, 2024

**A. DF-1: Scope of Application
Qualitative Disclosures**

The new capital adequacy framework applies to The Bank of Nova Scotia, India Branches ('The Bank').

The risk management framework of Indian operations is integrated with the Bank's strategy and business planning processes at global level. The Bank has comprehensive risk management framework to monitor, evaluate and manage the principal risks assumed in conducting its activities. The risk management function in India is as per directives and framework set out at Head Office level using a committee structure as outlined below:

Aligned with the above and factoring in the local regulatory environment, India operations are governed by a local addendum to the Enterprise-wide Risk Management Framework and is supported by a set of local governance committees.

The key Governance Committees that oversee various risk aspects in India include:

- India Management Committee (MANCOM)
- India Risk Management Committee (RMC)
- India Audit Committee
- India Asset-Liability Committee (ALCO)
- India Compliance Committee
- India AML Committee
- India IT Strategy Committee (ITSC)
- Special Committee on Frauds

As at 30 JUNE 2024, the Bank does not have any investment in subsidiaries/Joint Ventures and Associates.

In previous year, in line with the group's strategic alignment, the bank had informed RBI about its decision regarding proposed closure of its banking operations in India. Following the communication, the Bank is undertaking steps for orderly winddown and exit of business.

B. Capital Structure:

Qualitative Disclosures

Bank regulatory capital consists of two components – Tier 1 capital and Tier 2 capital. Both components of capital provide support for banking operations and protect depositors. As per Reserve Bank of India (RBI) guidelines, the composition of capital instruments for foreign banks in India would include the following elements:

Tier 1 Capital:

- Interest-free funds received from Head Office
- Statutory reserves kept in Indian books
- Remittable surplus retained in Indian books which is not repatriable so long as the bank functions in India
- Interest-free funds remitted from Head Office for acquisition of property

Tier 2 Capital:

- General provisions and loss reserves:
Reserves not attributable to the actual diminution in value or identifiable potential loss in any specific asset and are available to meet unexpected losses are included in Tier 2 capital subject to a maximum of 1.25 per cent of the total credit risk-weighted assets. Such provisions and reserves include General Provisions on Standard Assets, Unhedged foreign currency provision, Provisions held for Country Exposures and Investment Reserve Account'.

Quantitative Disclosure

(a) Tier 1 Capital (In Rs.000's)

| | |
|---|-------------------|
| Amount Received from Head Office | 8,394,130 |
| Statutory Reserves | 5,829,224 |
| Remittable Surplus Retained in India for CRAR | 3,617,952 |
| General Reserve | 94,920 |
| Less : Intangible Assets | 228,409 |
| Total Tier 1 Capital | 17,707,817 |

(b) Tier 2 Capital (In Rs.000's)

| | |
|--|----------------|
| General Provisions | 106 |
| Investment fluctuation Reserve | 400,000 |
| Country Risk Provisions | - |
| Total Tier 2 Capital | 400,106 |
| Of which Eligible as Tier 2 Capital | 400,106 |

(c) Debt Capital Instruments Eligible for inclusion in Upper Tier 2 Capital

(In Rs.000's)

| | |
|---|---|
| Total Amount Outstanding | - |
| of which amount raised during the current year | - |
| Amount eligible to be reckoned as capital funds | - |

(d) Subordinated Debt Eligible for inclusion in Lower Tier 2 Capital

(In Rs.000's)

| | |
|---|---|
| Total amount outstanding | - |
| of which amount raised during the current year | - |
| Amount eligible to be reckoned as capital funds | - |

(e) Other deduction from capital

There are no other deductions from capital.

(f) Total Eligible Capital

The total eligible capital is Rs. 18,107,923 thousands.

C. DF- 2: Capital Adequacy

Qualitative Disclosures

As part of the Bank's capital management program, sources and uses of capital are continuously assessed and monitored. The Bank deploys capital to support sustainable, long-term revenue and net income growth. Capital is managed using regulatory thresholds.

In managing the Bank's capital base, attention is paid to the cost and availability of the various types of capital, desired leverage, changes in the balance sheet and risk-weighted assets and the opportunities to profitably deploy capital. The amount of capital required for the business risks being assumed, and to meet regulatory requirements, is always balanced against the goal of generating an appropriate return.

The Bank's capital management framework includes a comprehensive Internal Capital Adequacy Assessment Process (ICAAP), aimed at ensuring that the Bank's capital is adequate to meet current and future risk. Key components of the Bank's ICAAP include sound corporate governance; establishing risk based capital targets; managing and monitoring capital, both currently and prospectively; and utilizing appropriate financial metrics which relate risk to capital. The ICAAP document is reviewed annually.

| Quantitative Disclosures | (In Rs.000's) |
|--|---------------|
| (a) Capital Requirements for Credit Risk: | |
| Portfolios subject to Standardised Approach | 68,644 |

| Total Capital Ratio | 562.95 % |
| Tier 1 Capital Ratio | 550.52 % |

D. DF -3: Credit Risk: General Disclosures

Qualitative Disclosures

Credit risk is the risk of loss resulting from the failure of a borrower or counter party to honour its financial or contractual obligations to the bank. Credit risk arises in the Bank's direct lending operations, and in its funding, investment and trading activities where counterparties have repayment or other obligations to the Bank.

Credit risk management policies are developed centrally by Global Risk Management in detail. Among other things, this includes the credit rating systems and associated parameter estimates, as well as delegation of authority for granting credit, calculating the allowance for credit losses and authorizing write-offs. The credit risk rating systems support the determination of key credit risk parameter estimates which measure credit and transaction risk. They form an integral part of enterprise-wide policies and procedures encompassing governance, risk management and control structure. All significant credit analyses and recommendations are presented to the credit adjudication units of Global Risk Management. Within the risk management framework, these credit risk units have defined authority levels appropriate to the size and risk of each transaction. For India operations, the Bank has a Local Loan Policy, which supplements the global policies and factors in various local regulatory directions.

The decision-making process begins with an assessment of the credit risk of the individual borrower or counterparty. Key factors considered in the assessment include: the borrower's financial results, credit statistics and projections where necessary the industry in which the borrower operates; economic trends; geopolitical risk and the borrower's management. Based on this assessment, a risk rating is assigned to the individual borrower or counterparty, using the Bank's risk rating systems. A separate risk rating is also assigned at the facility level, taking into consideration additional factors, such as security, seniority of claim, country risk cap, structure, term and any other forms of credit risk mitigation or enhancement that affect the amount of potential loss in the event of a default of the facility.

The Bank's credit risk rating systems are designed to support the determination of key credit risk parameter estimates which measure credit and transaction risk. These parameters are used in various internal and regulatory credit risk quantifications. The credit risk rating systems meet the objectives of transparency and replicability in order to provide consistency in terms of credit adjudication, minimum lending standards by risk ratings and reporting of credit risk. The internal risk ratings also determine the management level at which the facilities can be adjudicated /authorized or amended. Lower-rated credits require increasingly more senior management involvement, or Risk Policy Committee approval, depending on the aggregate exposure.

Global Risk Management is the final arbiter of internal risk ratings.

For recognition of past due and impaired loans and advances, the Bank follows guidelines prescribed by Reserve Bank of India as contained in circular DBOD.No.BP.BC.9/21.04.048/2015-16 dated July 01, 2015 on "Prudential norms on Income Recognition, Asset Classification and Provisioning pertaining to Advances" and other circulars/notifications issued by RBI during the course of the year in this regard.

Quantitative Disclosures

(a) Gross Credit Risk Exposures (In Rs.000's)

| | |
|--|--------|
| Total Fund Based Credit Risk Exposure (Note 1) | 70,228 |
| Total Non-Fund Based Credit Risk Exposure (Note 2) | 15,454 |
| Total | 85,682 |

Note 1: Amount represents funded exposure before credit risk mitigants.

Note 2: Amount represents non-funded exposure as per current exposure method and before credit risk mitigants.

(b) Geographic Distribution of Exposures (In Rs.000's)

| | Fund Based | Non Fund Based |
|----------|------------|----------------|
| Overseas | 41,653 | 15,454 |
| Domestic | 28,575 | - |
| Total | 70,228 | 15,454 |

| Opening Balance | - |
| Provisions Made During the Period | - |
| Less : Write-off | - |
| Less : Write-back of Excess Provisions | - |
| Closing Balance | - |

The bank has been allotted 2,829,361 equity shares of IVRCL Limited in respect of interest receivable from it pursuant to Corporate debt restructuring. These equity shares have been fully written off in the Financial Year 2023-24 and the bank has accounted the same at Re. 1/- in the books of accounts.

E. DF-4 : Credit Risk - Disclosures for Portfolios Subject to the Standardised Approach
Qualitative Disclosures

The Bank has adopted the standardized approach of the New Capital Adequacy Framework (NCAF) for computation of capital for credit risk with effect from 31 March 2008. The Bank has assigned risk weights to different classes of assets as prescribed by RBI.

As at 30 June 2024, the Bank has not considered external rating of claims of any borrower counterparty.

| Quantitative Disclosures of exposure | (In Rs.000's) |
|--------------------------------------|---------------|
| Below 100 % Risk Weight | 354,790 |
| 100 % Risk Weight | 242,111 |
| More than 100 % Risk Weight | - |
| Deducted | - |

F. DF-5: Credit Risk Mitigation - Disclosures for Standardised Approach
Qualitative Disclosures

The Bank's objective in securing collateral is to minimize losses and therefore is an important aspect of the Bank's credit risk mitigation strategy. Collateral refers to assets in which the Bank takes a legal interest in order to mitigate losses should a borrower counterparty default. The bank ensures that the taken collateral effectively mitigates substantial losses. The bank has

ensured compliance with respect to the right to legally take control, liquidate or otherwise deal with collateral when required.

As at 30 June 2024, the Bank has recognized the following collateral as eligible credit risk mitigant:

- Cash (including bank’s own fixed deposit receipts) on deposit with the Bank.

Cash as eligible financial collateral (FC) is readily realisable security and accordingly no limit has been prescribed to check concentration risk by the bank. Further, eligible cash as financial collateral is 0.00 % of total Risk Weighted Assets as at 30 June 2024.

Quantitative Disclosures

- (a) For each separately disclosed credit risk portfolio the total exposure that is covered by eligible financial collateral after the application of haircuts:

| (In Rs.000’s) | | | | | |
|----------------------|----------------------|-------------|-------------------------|---|---|
| Asset Class | Credit Risk Exposure | Eligible FC | Total amount of FC used | Net Amount of FC after Applicable haircut | Capital relief availed on account of FC |
| Loans | - | - | - | - | - |
| Letter of credit | - | - | - | - | - |
| Guarantees and Bonds | 564,074 | - | - | - | - |

- (b) The bank has not availed benefit of on or off balance sheet netting / guarantees / credit derivatives (wherever specifically permitted by RBI) as credit risk mitigant.

G. DF-6: Securitisation - Disclosure for Standardised Approach

The Bank does not have any securitization exposure.

H. DF-7: Market Risk in Trading Book

Qualitative Disclosures

Market risk is the risk of loss from changes in market prices and rates (including interest rates, credit spreads, equity prices, foreign exchange rates and commodity prices), the correlations among them, and their levels of volatility.

Globally, the Board of Directors (“The Board”) at Head Office, Canada reviews and approves the Risk Appetite Framework and establishes the market risk appetite of the overall Bank annually. The Board delegates authority for overall market risk management and monitoring compliance with the VaR and stress testing limits to the President and CEO who, in turn delegates it to the Market Risk Management and Policy Committee (“MRMPC”). As part of this delegation, the MRMPC is expected to ensure that the Bank’s market risk management and control framework is operating effectively. This includes further allocation of limits,

approval authorities, and delegation of risk monitoring and control responsibilities to Global Risk Management, Back Office units and senior management, as deemed appropriate.

India Management Committee (“MANCOM”) reviews and approves the India Risk Appetite Framework and provides overarching governance and oversight locally. The Bank’s Asset Liability Committee (“ALCO”) in India oversee the application of the framework locally.

Market risk policies define the approach to the assessment, reporting, control and management of market risk. These policies are reflected in market risk limits. Market risk limits are set within the limits and policies established by the Board. The limit management policies and processes ensure that activities are conducted in a manner that is commensurate with the Bank’s risk appetite and safety and soundness standards. Limits are established to ensure the risk-taking activities remain within the bounds of the Bank’s risk appetite while allowing for normal and profitable business activity. Limits are reviewed annually.

Global Risk Management (“GRM”) provides independent oversight for both Trading and Treasury (ALM) activities of the Bank and in ensuring all positions and their inherent key risks are properly identified, quantified, controlled, monitored and reported. GRM advises and support MRMPC and ALCO with analysis, risk measurement, monitoring, reporting, proposals for standards and support for new product development. The Bank uses metrics and models to measure and control market risk exposures. The measurements used are selected based on an assessment of the nature of risks in a particular activity. The principal measurement techniques are Value at Risk (VaR) and Gap analysis. All Limits are independently monitored on a continuing basis by monitoring unit as defined in limit documents.

Compliance to the limits are monitored by independent monitoring units as defined in the limit document on a periodic basis. Overruns of limits are reviewed to establish the cause and are resolved in an effective and timely manner. All overruns are reported to MRMPC (Head Office) and locally to Risk Management Committee (“RMC”).

Quantitative disclosures

| The Capital Requirements for: | (In Rs.000’s) |
|-------------------------------|---------------|
| Interest Rate Risk | 1,524 |
| Equity Position Risk | 41,328 |
| Foreign Exchange Risk | 0 |
| Total | 42,852 |

I. DF-8: Operational Risk

Qualitative disclosures

Operational risk is the risk of loss, whether direct or indirect, to which the Bank is exposed due to external events, human error, or the inadequacy or failure of processes, procedures, systems or controls. Operational risk, in some form, exists in each of the Bank's business and support activities and can result in financial loss, regulatory sanctions and damage to the Bank's reputation. Operational risk encompasses business process and change risk, technology failure, financial crime and legal and regulatory risk.

The governing principles and fundamental components of the Bank's operational risk management approach include:

- Accountability in the individual business lines for management and control of the significant operational risks to which they are exposed.
- A well-defined internal control procedure.
- An effective organization structure through which operational risk is managed, including:
 - A Board of Directors responsible for sound corporate governance.
 - Executive management who have clearly defined areas of responsibility.
 - Separation of duties between key functions.
 - An independent internal audit department responsible for verifying that significant risks are identified and assessed and for determining whether appropriate controls are in place to ensure that overall risks is at an acceptable level.
 - The Bank's business continuity management policies, which require that all business units develop business continuity capabilities for their respective functions. The Bank's Business Continuity Management Department at Head Office is responsible for governance and oversight of the Bank's business continuity and tracks, monitors and ensures compliance with these policies.
 - The Bank's training programs, such as the mandatory Anti-Money Laundering, Operational Risk and Information Security courses and examination which ensure employees are aware and equipped to safeguard our customers' and the Bank's assets.
 - Risk mitigation programs, which use insurance policies to transfer the risk of high severity losses e.g. cash, where feasible and appropriate.

Approach for Operational Risk Capital Assessment

As per RBI guidelines, the Bank has adopted Basic Indicator Approach (BIA) for assessing capital for Operational Risk. As per BIA, the capital requirement as on 30 June 2024, is Rs. 258,412 thousand (*previous year Rs. 260,714 thousand*).

J. DF-9:-Interest Rate Risk in the Banking Book (IRRBB)

Qualitative Disclosures

Interest Rate Risk in Banking Book (IRRBB) refers to the risk of loss in earnings or economic value of the Bank's Banking Book as a consequence of movement in interest rates. Interest rate risk arises from holding assets / liabilities and Off-Balance Sheet items with different principal amount, maturity dates or repricing dates thereby creating exposure to changes in levels of interest rates. The Bank actively manages its interest rate exposures with the objective of enhancing net interest income within established risk tolerances. Management of Interest rate risk arising from the Bank's funding and investment activities is managed by Treasury governed by local Asset Liability Committee (ALCO) in accordance with Board-approved policies (Head Office – Toronto, Canada) and allotted limits.

Interest rate exposure calculations are generally based on the earlier of contractual re-pricing or maturity of on-balance sheet and off-balance sheet assets and liabilities, although certain assets and liabilities such as deposits without a fixed maturity are assigned a maturity profile based on longevity of the exposure. Gap analysis is used to assess exposures and for planning purposes.

Quantitative Disclosures

As required under Pillar III norms, the increase / decline in earnings and economic value for an upward / downward rate shock of 200 basis points as on 31 March 2024, broken down by currency is as follows:

Earnings Perspective

(In Rs.000's)

| Currency | Interest Rate Shock | |
|-----------|---------------------|-------------|
| | 2% Increase | 2% Decrease |
| Rupees | 316 | (316) |
| US Dollar | - | - |

K. DF-10 : General Disclosures for Exposures Related to Counterparty Credit Risk

Counterparty Credit Risk (CCR) limits are set within the context of established lending criteria and guidelines for individual borrowers, particular industries, and certain types of lending, to ensure the Bank does not have excessive concentration in any single borrower, or related group of borrowers, particular industry sector or geographic region. Bank ensures that applicable norms on exposure stipulated by RBI for both fund based and no-fund based products are complied with. CCR limits are set on the amount and tenor while fixing the limits to respective counterparties with distinct limits for each type of exposure. The utilization against sanctioned limit is monitored regularly. Analysis of composition of the portfolio is presented to the Risk Management Committee on a quarterly basis.

Bank engages in collateralised borrowing from Reserve Bank of India and Clearing Corporation of India Ltd (CCIL) against Government of India securities/ Treasury Bills where, haircut is stipulated based on maturity of the instrument and does not depend on the credit rating of the borrower. Also the Bank does not deal in derivatives which, requires Bank to post additional collateral in case of a downgrade. Hence Bank's credit rating downgrade will not impact the collateralised borrowing operations.

In line with the wind down strategy there are no derivative transactions outstanding as of 30 June 2024 and hence no counterparty credit risk as of 30 June 2024.

Quantitative Disclosures

| (In Rs.000's) | |
|---|-------------------------------|
| Particulars | As at 30 June 2024 |
| Gross positive fair value of contracts | - |
| Netting benefits | - |

| Total Assets | | 21,095,516 | 21,095,516 |

The bank has been allotted 2,829,361 equity shares of IVRCL Limited in respect of interest receivable from it pursuant to Corporate debt restructuring. These equity shares have been fully written off in the Financial Year 2023-24 and the bank has accounted the same at Re. 1/- in the books of accounts.

M. Equities – Disclosure for Banking Book Positions

The bank has no equity investment in banking books as of 30 June 2024.

The bank has been allotted 2,829,361 equity shares of IVRCL Limited in respect of interest receivable from it pursuant to Corporate debt restructuring. These equity shares have been fully written off in the Financial Year 2023-24 and the bank has accounted the same at Re. 1/- in the books of accounts.

N. Leverage Ratio

The Basel III leverage ratio is defined as the capital measure (Tier-1 capital of the risk based capital framework) divided by the exposure measure, with this ratio expressed as a percentage. As per RBI guidelines, disclosures required for leverage ratio for the Bank at the consolidated level at 30 June 2024 is as follows.

Table DF 17- Summary comparison of accounting assets vs. leverage ratio exposure measure

| Sr. No. | Particulars | In Rs. 000's |
|----------------|--|---------------------|
| 1 | Total consolidated assets as per published financial statements | 21,095,516 |
| 2 | Adjustment for investments in banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation | - |
| 3 | Adjustment for fiduciary assets recognised on the balance sheet pursuant to the operative accounting framework but excluded from the leverage ratio exposure measure | - |
| 4 | Adjustments for derivative financial instruments | - |
| 5 | Adjustment for securities financing transactions (i.e. repos and similar secured lending) | - |
| 6 | Adjustment for off-balance sheet items (i.e. conversion to credit equivalent amounts of off- balance sheet exposures) | 564,074 |
| 7 | Other adjustments | (228,409) |
| 8 | Leverage ratio exposure | 21,431,181 |

Table DF-18: Leverage ratio common disclosure template

(In Rs.000's)

| On-balance sheet exposures | | |
|---|--|-------------------|
| 1 | On-balance sheet items (excluding derivatives and SFTs, but including collateral) | 21,095,516 |
| 2 | (Asset amounts deducted in determining Basel III Tier 1 capital) | (228,409) |
| 3 | Total on-balance sheet exposures (excluding derivatives and SFTs) (sum of lines 1 and 2) | 20,867,107 |
| Derivative exposures | | |
| 4 | Replacement cost associated with all derivatives transactions (i.e. net of eligible cash variation margin) | - |
| 5 | Add-on amounts for PFE associated with all derivatives transactions | - |
| 6 | Gross-up for derivatives collateral provided where deducted from the balance sheet assets pursuant to the operative accounting framework | - |
| 7 | (Deductions of receivables assets for cash variation margin provided in derivatives transactions) | - |
| 8 | (Exempted CCP leg of client-cleared trade exposures) | - |
| 9 | Adjusted effective notional amount of written credit derivatives | - |
| 10 | (Adjusted effective notional offsets and add-on deductions for written credit derivatives) | - |
| 11 | Total derivative exposures (sum of lines 4 to 10) | - |
| Securities financing transaction exposures | | |
| 12 | Gross SFT assets (with no recognition of netting), after adjusting for sale accounting transactions | - |

| | | |
|--|---|-------------------|
| 13 | (Netted amounts of cash payables and cash receivables of gross SFT assets) | - |
| 14 | CCR exposure for SFT assets | - |
| 15 | Agent transaction exposures | - |
| 16 | Total securities financing transaction exposures (sum of lines 12 to 15) | - |
| Other off-balance sheet exposures | | |
| 17 | Off-balance sheet exposure at gross notional amount | 1,128,149 |
| 18 | (Adjustments for conversion to credit equivalent amounts) | (564,074) |
| 19 | Off-balance sheet items (sum of lines 17 and 18) | 564,074 |
| Capital and total exposures | | |
| 20 | Tier 1 capital | 17,707,817 |
| 21 | Total exposures (sum of lines 3, 11, 16 and 19) | 21,431,181 |
| Leverage ratio | | |
| 22 | Basel III leverage ratio | 82.63 |
